

Please see below from the Emergency Department administration at LBJ Hospital in regards to their response to the COVID-19 pandemic:

*“As LBJ Hospital continues to prepare for a potential surge of COVID-19 patients, there are a few important changes to the EMS arrival process that your department should be aware of.*

*LBJ Hospital has erected two large medical tents that will serve as the new triage and intake area for all patients experiencing **respiratory conditions, fever, or flu-like symptoms.**”*

The tents are set up in Parking Lot F, on the east end of the building (see map below). Ambulances transporting patients that meet the above criteria can park in the usual ambulance bay and walk the patient/stretcher down the sidewalk to the tents, or can utilize the COVID EMS entrance off the driveway as marked below.

Also remember that all transports of patients with symptoms consistent with COVID-19 should be called into the Base Station as Priority 2 transports to facilitate early notification of the hospital.
